Walnutport, Pennsylvania 18088

Dear Kermit:

Thank you for your report and acknowledgement of the 9/7/73 broadcast of WLVR-FM. WLVR-RM is a non-commercial educational radio station licensed by Lehigh University.

We broadcast on an assigned frequency of 91.3 MHz, on Channel 217. Our transmitter is a modified FM exciter equipped for 10 W output, and is manufactured by CCA Electronics. Our antenna is mounted on a 16 foot tower, which is on the roof of Packer Hall, the University Center, the main meeting and student dining center on the Lehigh Campus. The antenna is at an overall height above ground of 99 feet, and 494 feet above sea level. The exact location is 40° 36' 22" north latitude, and 75° 22' 42" west longitude.

We conducted our first engineering tests in February, and our first program test in May. Our first regularly scheduled broadcast was August 27, 1973. This is a result of thirteen years effort to secure a license. Thank you for your report of our broadcast quality. This is the first report we have had of our signal outside of 15 miles.

I hope you continue listening to WLVR-RM in the future, as we try to bring you progressive music, public events, and Lehigh and other local sporting events. Thank you once again for your report on the reception of WLVR-RM

Sincerely yours,

William E. Maier
